Imageline

Imageline srl is a company from Odorheiu Secuiesc, well capitalized and specialized in editing, advertising, marketing, and communication services.

Our beneficiaries are corporations who desire complete quality services, who require punctuality and exigency. Our services are mainly aimed at companies in the woodworkers' trade. For those in the field, we provide very advantageous collaborations and we emphasize loyalty building.

The company's main activities: editing the Intarzia&Castor woodworking magazine and organizing the Expowood Forestry and Woodworking Trade Fair. At the same time, we are organizing partners in a large number of other trade events. We believe that we have the experience and professionalism necessary to be able to take advertising campaign projects to completion, by creating and projecting catalogues, flyers, portfolios, banners etc., to organize marketing communications, as well as to create corporation identity.

Over its 17 years of publication, the Intarzia&Castor Magazine has achieved the performance of attaining and maintaining its status as leader of the specialized press in the wood industry from Romania.

The Intarzia magazine - leader in the professional press from the wood industry of Romania - monitors the information, news, innovations, events, and technological tendencies in the European Union.

Its collaboration with prestigious magazines in the technical area from Germany, Italy, Austria, and Hungary, make the magazine the most important information provider in our guild concerning news, markets, management, education, and events. Its consistent presence on the internal market and, in particular, on the European market, led to the achievement of a continuous channel of communication between readers and the European market.

The readers fall into two categories: subscribers and occasional readers. The subscribers receive the magazine by mail, wrapped in plastic, regularly, on a fixed date. Occasional readers receive the Intarzia magazine by mail, 2 or 3 issues per year, or via direct contact on the occasion of its distribution in fairs, symposiums, and conferences. According to calculations, the number of permanent readers amounts to approximately 12,000 persons.

SAUCOLEMN

Set up in 1994, SAUCOLEMN Company situated in north Romania established itself as a regional leader in the woodworking industry, running an activity which starts with cutting the timber, steaming, drying, the making of laminated panels from derivatives of panels - indoor stairs, laminated doors and windows.

The products are realised using high technology equipment and they have been displayed at international fairs in Hanover and Milan.

This fact together with our way of organising the technological flux, using only wood from controlled landscaped forrests, led to the achieving of the following certifications of product quality:

-DQS GmbH, for certifications BH OHSAS 18001:2007 and ISO 9001:2000

-IQ Net, for certification ISO 9001:2000

-FOREST STEWARDSHIP COUNCIL A.C., for certification FSC.

1. Edge glued beech panels - this is our main product and it is produced in two versions: finger jointed panels and solid wood panels. Both versions are made out of slightly steamed timber. The maximum sizes are 50 x 1250 x 6000 mm. We produce 4 quality classes of beech panels - class A/B - face A, it means without knots, without cracks, without a red heart or coloration (blue or black coloration), without any repair works and all the constituent laminations have a UNIFORM COLOUR in the PANEL.

CLASS B/B - face B, this means without knots, cracks, red heart, coloration (blue or black coloration), without any repair works, but there are differences in shades between the constituent elements of the panel, mostly as a steaming consequence.

- Class C/C technical - face C technical, this does not allow knots or cracks, but there are red hearts, healthy coloration of any kind, small repairing work using lute/putty but just on one side.

- class C/ C rustic - face C rustic healthy knots are unlimittedly accepted as well as falling knots and small repaired cracks, red hearts, and coloration of any kind.

2. LAMINATED BEAMS FOR DOORS AND WINDOWS - these are made of beech and oak wood in three layers.

3. INDOORS STAIRS - these are made of edge glued beech and oak panels using specialised software (designing Compass and CNC robot in 5 axes for execution) and thus we are flexible in accomplishing individualized projects, different from client to client.

4. Doors and windows made of laminated wood - Saucolemn has the advantage to be able to produce the doors and windows in arches and rear-arches or any other irregular shapes, while the making these products would not be possible using classical technology.

5. Tables made of laminated panels - these tables can be varnished or oiled, in different shapes - square, rectangular, round or oval.

RUMÄNIEN BEI INTERZUM - Köln, Germany

SIGSTRAT

SIGSTRAT SA, commercial company was founded in 1993 being separated from the departments of semifinished products and wooden boards of the former wood processing plant, Sighetu Marmatiei.

From the moment the company came into being and for the time being it diversified its activity. Now we make beech plywood, moulded beech elements, chairs, tables and other wooden products.

We are constantly concerned of modernizing and renewing the technology of our production departments with new equipments new technology and performance of our production to meet the quality requirements of the European standard.

MOULDED ELEMENTS FOR SEATS AND BACKS

Elements ready for being assembled on metal framework, seats and backs having a high grade of finishing and superior quality in more than 250 models, made in accordance with the requirements of our clients so that they fit exactly during the assembling work. We use high quality lacquer having special characteristics that they meet the requirements (antiscratches, waterproof, antigliding a.s.o.)

SEATS AND BACKS FOR UPHOLSTERY USE

Seats and backs for being upholstered are made with high precision on CNC machines specialized so that the assembling work becomes easy.

Unicom Holding SA , a Romanian private society , established in the year 1993, started in 2000 its activity in the domain of wood processing. The investment , still in a continuous development, concretizes in a modern factory for wood processing, situated in Rosiorii de Vede town, Teleorman district.

In order to produce Massive Panels we use both the finger jointing technology as well as edge gluing. We produce finger jointed panels with a maximum length of 6000 mm, a width of 1220 mm, and a thickness between 18-45 mm. The capacity of the new factory is abt. 200 cbm /month.

The modern technology used for the fabrication process as well as the qualified employees allow us to obtain quality products, that have passed the quality tests imposed by our foreign partners (Germany, Denmark, Sweden, France) and who give us assurance that our products face the competition imposed by joining the European Union.
