Silcar was founded in 1991 in the city of Zalau, in the north-west of Romania. With the main field of activity in the production of PVC doors and windows with double or triple-glazing, we are presently one of the leading manufacturers in the region, competing with over 80 dealers from Transylvania and even countries like Slovakia, Hungary, Germany, and Belgium. Our portfolio contains partnerships with public institutions, city halls, schools, churches, nurseries, hospitals, etc.

Having direct contact with suppliers, we guarantee the best value for quality rate on the market. We established partnerships with leading companies such as: Veka and Profine - our PVC profile providers, Maco and Roto -our hardware suppliers, thus managing to maintain a high standard of quality in our products. Production for doors and windows is realized on three last generation fully equipped lines, the process being almost entirely automated, providing on average a capacity of 300 u.f. per 8 hour shift.

We can offer:

- VEKA, TROCAL 76, and KBE PVC profiles ,.
- Maco Multimatic and Roto NT hardware
- A wide range of colors for the profiles
- Ornamental glasses, tempered glass, laminated glass, etc.
- Insect nets on hinges or roll-up type
- Aluminum shutters
- Roll-ups
- Casonetti
- Other additional products.

All our products are subjected to performance assessment and verification, having CE Marking and ISO 9001 certificate according with EU legislation. Additionally, we offer technical assistance at a high level due to the vast experience of our company staff.

Situated near Bucharest, in Moara Vlasiei commune – the two SUKI plants – window plant and foil plant – are extended on a surface of approximately 8 ha, from which the gross building area of 3000 sm. The window plant is equipped with German technology – Urban machinery – and the entire production process is controlled by the Klaes specialized software.

The diversity and complexity of the products manufactured in our plants are the witness of our competence and expertise of the approximately 50 technicians and specialists working directly in the production. The continuous control of quality, periodic testing, technical audits performed by specialists outside the company and the permanent feedback of our customers are the vectors of the performance and maintenance of a top level of our products.

## Technic Glass

SC Technic Glass SRL was founded in 2002, being specialized in glass working and trimming float glass: glass and mirror cutting, stoning, shaping, drilling, securing, sticking and frosting, production and mounting of glass walls, etc.

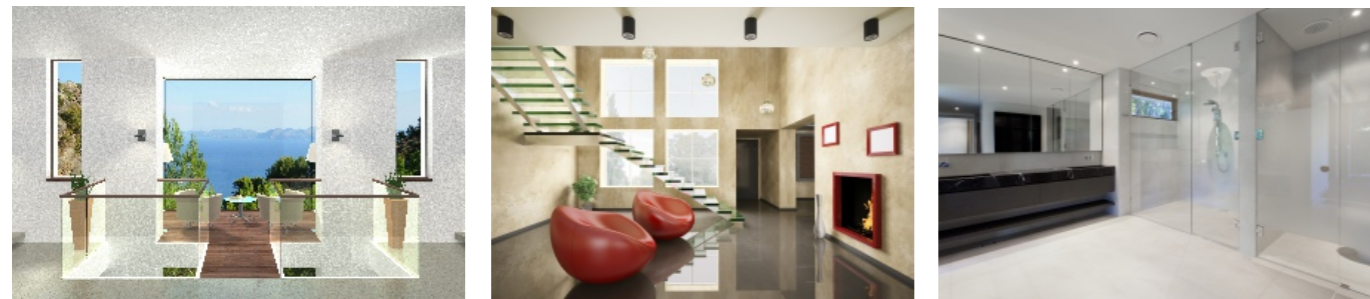

We use large size float glass (JUMBO – 6000 x 3210mm), manufactured by Guardian, Saint Gobain, Glavelbel – AGC:

- Mass coloured glass (PLANIBEL)
- Glass with hard reflexive coating (STOPSOL, ANTELIO)
- Glass with soft reflexive coating (COOL LITE, SUNGUARD S)
- Multifunctional glass with soft coating (COOL LITE, SUNGUARD HP)

Using advances technology , Technic Glass is innovating year after year.

We manufacture double pane glasses and partition walls, steps and balustrades made of glass, a wide range of shower enclosure, glass tables and tops for furniture industry, glass plating for walls. We temperate , satinare and laminate the glass. Our products are made of high quality extra-clear or ultra-clear glass with various finishes, processing and treatments.

Being a material that does not deteriorate due to environment, and having a sustainable resistance in time, we propose to use as much as possible glass in architecture and design field.

Born in 1993 as a manufacturer of PVC windows and doors, the company is now a leader in window systems, active both nationally and internationally. All the PVC windows and doors manufactured in our factory are certified and in compliance with all the demands of the European Union (CE).

SC Thermo Design SRL is dealing with the manufacture of PVC systems REHAU, reinforced with galvanized steel, hardware MACO Multimatic, with double/triple glazing, works that satisfy the highest demands. Our products are executed in our own factory which operates on an area of approximately 7.000 square meters, going through a well-defined flow technology, with modern german machinery Sturtz and Elumatec and having a capacity of 500-650 units/day.

The highly competitive nature of this area has resulted in ongoing research and continuous investments in new technologies and human resources. For our clients we have integrated all the benefits and advantages of a window in a high-end product, the product that guarantees comfort and safety of the home! Our windows and door systems are distinguished not only by the precision with which are realized, the special attention to appearance, but also by the optimal coefficients of thermal and acoustic insulation.

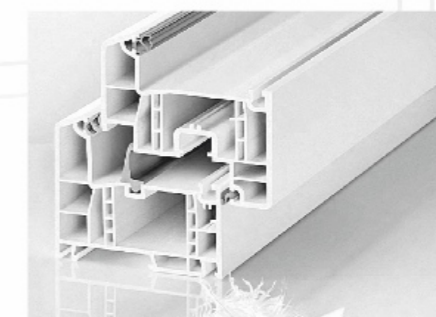

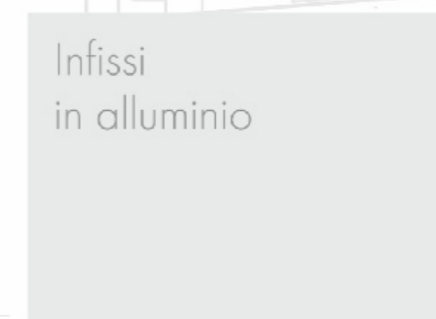

The wide range of systems of profiles that ensures a long life and easy maintenance, can justify that we have reached a point where we guarantee complete satisfaction even to the most demanding customers.

Regarding relations with suppliers and partners, they are always materialized in close cooperation and constant communication to identify new market approach solutions. The benefits of our representatives are: excellent price, technical help and advice, the possibility to customize the offers with their logo, software to calculate estimates, international logistics and minimum period of execution of orders. At present, we can say that we have the best value for money. Reliability, Quality and Professionalism are the key words that characterize us!

Con il cuore aperto

Founded in 1995, Valras manufacturing double/triple glazing units and our main objective is to supply premium products only at competitive prices. In a tough competitive environment you cannot counteract and get in the front line by exclusive quality only. We always have known to respond in an intelligent way to the more and more exigent demands of the market, constantly improving and extending the products range. The company's activity is presently structured in two main divisions: double-glazing units and artistic glass.

The manufacturing process of the thermo-insulating glass is totally automatized. Our products are made exclusively automatically, with high technology. The materials used are provided by internationally renowned producers.

We deliver insulating glass for:

- residential application (double, triple)  $U_g = 0,5 - 1,3 \text{ W/mpK}$ ,
- projects (semistructural, structural) sealed with polysulphide or UV silicon

The innovative power and the wish to overcome the classic patterns led to making an unique product line: artistic glass. The craftsmanship of our designers and employees completes the technical fusion process to give birth to real pieces of art.

With a unique design and spectacular colours, the decorative glass made by our company has a very large applicability area: artistic thermo-insulating windows, stained glass, doors, walls, decorative objects.

Promoting quality and professionalism at all level, our company is presently the founding member of the Thermo-Insulating Carpentry Producer's Ownership. Our company has been granted a certification according to the ISO 9001 standards. The company's competence and professionalism have been proved by receiving special rewards.

Valras is among 3% companies in Europe certified under CE marking.

Also, VALRAS is a registered mark, and the most important of the artistic and sanded models are protected by law, as industrial models.

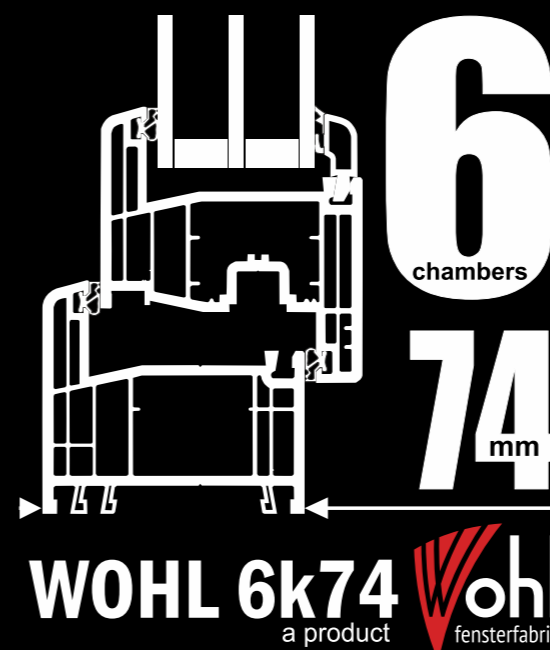

The value system that we have adopted aims external activity of the company as well: our business relation are exclusively based on respect, integrity and promptitude.

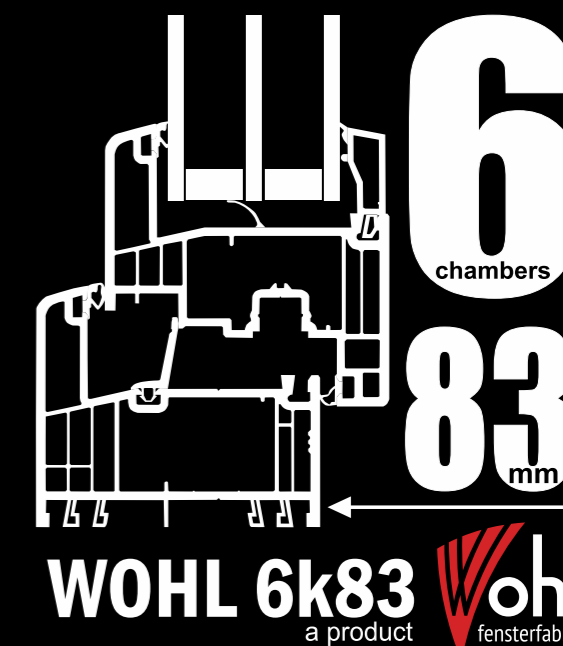

**VALRAS- Exclusively premium products for people who do not accept anything else.**
